John Kearney

Hi, I'm John!

I'm a student and musician living in Boone, NC with a background in computer science. I like to explore the intersectionality between CS and music in my projects.

Projects

January 2017 - Current
Audio Production & Sound Design
Armed with nearly two decades of formal training in classical & jazz piano and percussion, I've been fortunate to work with and produce for a variety of artists to help curate and inform their growing sounds. C: PinkPantheress, Riovaz, Maasho & Others.

February 2021 – July 2022
Project Coordinator *Passivbot*
Responsible for coordinating the development of a quantitative analysis tool used in distributed financial markets in licensed and open-source capacities. Organized and managed community building aspects (Website, discord server, documentation) for better visibility.

May 2019 - Current
Software Development
I have built a variety of projects spanning genres in penetration testing, data processing, dialogue synthesis, web design and development, backend architecture, VST applications, and e-mail marketing tools. Fluent in Python & JavaScript flavors. Check out my GitHub for more!

Education

August 2022 - Current
B.S. Computer Science
Appalachian State University

Skills

- Adobe Suite
- Ableton & Fl Studio
- Git
